EDUCATION

VIT Bhopal University

B.Tech. in Computer Science and Engineering

2022 – 2026

CGPA: 8.6/10

SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL

Technologies & Tools: NextJS, NodeJS, Flask, RESTful APIs, LLMs, Git & GitHub, SSH, Deployment Automation

Databases: MySQL, MongoDB, SQLite, Elasticsearch

Relevant Coursework: Object Oriented Programming, Databases, Data Structures & Algorithms, Computer Networks

Core Strengths: Backend Development, API Design, Database Handling, Query Optimization, System Thinking, Problem Solving

EXPERIENCE

MERN Stack Developer Intern | React.js, Next.js, Node.js, MongoDB

February 2025 – May 2025

Nenosystems Consulting Services

- Built full-stack web applications using Next.js, TypeScript, Node.js, & MongoDB, contributing to product workflows.
- Engineered responsive UI interfaces using SSR and SSG, reducing runtime errors through TypeScript.
- Built 15+ RESTful APIs with Node and Express to support data handling and client-server communication.
- Integrated MongoDB and collaborated with the team through Git and GitHub across 4 production releases.

PROJECTS

Network Detection and Response *React.js, Next.js, TypeScript, Zeek, Suricata, Python*

Jan 2026 – Apr 2026

- Built a 6+ pages NDR dashboard ingesting Suricata and Zeek logs, correlating alerts, flows, and behavioral anomalies.
- Architected 18+ backend API routes & multiple asynchronous workers, processing 1.06M correlated telemetry records.
- Designed SSH-based automation to manage uploads, validation, deployment and rollback operations across 5+ remote probes.
- Added IOC ingestion and enrichment for 50+ malicious IPs, domains, hashes, and TLS certificates.
- Implemented analytics pages for correlated logs, including DGA detection and outlier analysis via Tranco 1M whitelisted domain list.
- Built security flag logic to detect large uploads, large downloads, long-lived connections, and suspicious protocol behavior.

NyAI - AI-Powered Legal Research Assistant *Next.js, TypeScript, REST APIs, RAG*

May 2025 – June 2025

- Reduced legal research time by 90% from 4–6 hours to under 10 minutes by architecting a serverless SaaS platform.
- Built a interactive chat interface with React and TypeScript in Next.js to improve responsiveness and reduce latency.
- Integrated AI services using RESTful endpoints, managing rate limits and efficient payload delivery for the RAG pipeline.
- Engineered a retrieval-augmented generation workflow with Cloudflare AutoRAG and indexed 20,000+ legal documents.

Crime Identification System *Python, Flask, TensorFlow, OpenCV, MySQL*

Sept 2024 – Mar 2025

- Built an AI-powered surveillance system for real-time violence detection and automated alerting.
- Engineered a backend using Flask and MySQL for user authentication and secure data handling.
- Implemented server-side validation with Flask-WTF and bcrypt-based password hashing to protect user credentials.
- Processed HD video streams with TensorFlow and OpenCV to move data from capture to alert generation.
- Automated emergency notifications via Telegram API, triggering accurate alerts during testing.

CERTIFICATIONS

- Artificial Intelligence Powered by Google Developers

EXTRACURRICULAR

Tech Lead - MERN Stack Club

- Led a 15+ developer team to organize 2 successful hackathons for 1000+ participants.
- Developed a project submission portal and a real-time judging dashboard that handled 80+ project submissions.
- Delivered 5+ technical workshops on MERN stack and mentored 150+ students.
